CAREER OBJECTIVE

I am a **highly motivated and curious Frontend Developer** with a clear goal: to create **user-centric, high-performance responsive web applications** using modern **JavaScript (ES6+)** and **React.js**. I am eager to grow my technical skills and contribute to team success in a progressive environment. My core strengths include **effective Problem-Solving**, **strong communication**, and a commitment to **collaborative teamwork**.

PROJECTS

1)HomeHero: Live Site | GitHub (Client site) | GitHub (Server Side)

- Full-stack web application designed to connect users with verified providers for booking household services
- Users can book services, select their preferred date and time, and view booking history directly from their dashboard.
- Users can rate and write reviews for booked services. Each review is stored under the specific service as an array of review objects, and the top-rated services are dynamically displayed on the homepage.
- Technologies: React.js, Next.js, Node.js, Express.js, MongoDB, Firebase

2)Toy-Store: Live Site | GitHub (Client site)

- ToyStore is a fully functional e-commerce solution designed to manage online sales of toys.
- Implemented with Stripe/PayPal integration for safe and seamless payment processing.
- Secure registration and login functionality with protected user profiles.
- Technologies: React.js, Tailwind CSS

SKILLS

Programming Languages: JavaScript (ES6+)

Frameworks: Next JS, React.js, Node.js, Express.js, Tailwind CSS, Bootstrap

Database & Tools: MongoDB, Firebase, GitHub

Deployment: Vercel, Netlify

Soft Skill: Problem-Solving, Communication, Team work
