CAREER OBJECTIVE

I am a highly motivated **Front-End Developer** specializing in building user-centric and high-performance web applications using **React.js and modern JavaScript (ES6+)**. I have a proven track record of converting complex design files into responsive, interactive digital experiences. I am eager to leverage my technical expertise in frontend workflows to contribute to a progressive development team.

PROJECTS

1) BookCourier: **Live Site** | **GitHub (Client site)** | **GitHub (Server Side)**

- Developed a comprehensive service booking system with a real-time tracking dashboard for users.
- Implemented a dynamic review system where top-rated services are prioritized using MongoDB aggregation.
- Integrated Firebase for secure multi-role authentication (User/Provider).
- Technologies: React.js, Next.js, Node.js, Express.js, MongoDB, Firebase

2) HomeHero: **Live Site** | **GitHub (Client site)** | **GitHub (Server Side)**

- Optimized web performance using **Next.js** server-side rendering for faster page loads and better SEO.
- Built an interactive UI with **Tailwind CSS**, ensuring 100% responsiveness across all mobile and desktop devices.
- Created a structured booking flow where users can select time-slots and view history with live status updates.
- Technologies: React.js, Next.js, Node.js, Express.js, MongoDB, Firebase
